Professional Summary

Backend-focused Software Engineer with 5+ years of experience designing, implementing, and optimizing scalable server-side systems and full-stack web applications. Proficient in Node.js, Express, JavaScript, TypeScript, and SQL/NoSQL databases. Demonstrated expertise in AI-driven automation using Azure OpenAI and OpenAI APIs, real-time systems with WebSockets, and enterprise-grade application development. Proven ability to reduce operational costs, improve system performance, and deliver measurable business impact across customer support, fintech, and gaming domains.

Technical Skills

Languages: JavaScript (Advanced), TypeScript (Advanced), SQL, HTML, CSS
Backend: Node.js (Advanced), Express.js (Advanced), REST APIs, WebSockets, Cron Jobs
Frontend: React.js (Expert), Redux, React Hooks, Context API, Responsive Design
Databases: MS SQL Server (Advanced), MySQL (Advanced), PostgreSQL (Advanced), MongoDB (Intermediate)
AI & Cloud: OpenAI API, Azure OpenAI Services, Azure App Services, Microsoft Teams Bot Framework
DevOps & Tools: Git (Advanced), Docker, Kubernetes, Datadog, Sentry, Bing Spell Check API
Testing: End-to-End Testing, Unit Testing, QA Automation

Professional Experience

Senior Software Engineer – Backend Developer December 2024 – Present
Accenture Noida, India

- Designed and implemented scalable backend systems and AI-driven automation solutions using Node.js, Express.js, MS SQL Server, OpenAI API, Azure OpenAI, and scheduling tools (cron jobs).
- Automated Chat Auditing System:** Built an end-to-end auditing pipeline for customer support chats using Node.js, OpenAI API, Bing Spell Check API, and MS SQL; reduced manual QA effort by **70%** through automated evaluations, cron-based scheduling, and Excel-based email reporting.
- Break Management Portal:** Architected backend services for a real-time agent break scheduling portal using Node.js, Express.js, WebSockets, MS SQL, and cron jobs; reduced scheduling conflicts by **40%** and achieved scalability for **500+ concurrent users**.
- AI Rapid Response System:** Developed an AI-powered ticket resolution engine using Node.js, Azure OpenAI, and MS SQL; reduced first-response time by **60%** and auto-resolved **35%** of repetitive support tickets, significantly lowering operational costs.
- Voice Bot – Microsoft Teams (Internal IT Support):** Built a voice-enabled Microsoft Teams bot using Node.js and Azure OpenAI Services to automate internal IT support workflows; implemented voice input handling, intent detection, and AI-driven response generation; deployed on Azure App Services with a scalable architecture to support concurrent users and reduce dependency on manual IT support.

Software Engineer – Full Stack Developer August 2022 – December 2024
EV Software Solutions Pvt Ltd Noida, India

- Increased code implementation efficiency by **55%** by introducing key React.js architectural strategies and best practices for a development team of 25, significantly improving project turnaround times.
- Led development of a large-scale, customer-facing web application resulting in a **45% increase in user engagement** using React.js and Redux.
- Improved UI performance by **60%** by identifying bottlenecks and leveraging Context API and React Hooks for optimized state management.
- Reduced application loading time by up to **40%** through component optimization and efficient use of React lifecycle methods.
- Implemented responsive design principles, transforming static pages into dynamic interfaces and reducing device-specific bugs by **35%**.
- Integrated error logging and monitoring tools (Datadog and Sentry) into frontend applications for real-time issue detection and resolution.
- Designed and implemented a role-based access control (RBAC) system on both frontend and backend platforms for comprehensive user permission management.

- Initiated and led end-to-end testing initiatives, improving upfront bug detection by **40%** and reducing late-stage bug fix requirements.

Customer Support Executive (CS Executive)

September 2020 – August 2022

iEnergizer Services Pvt Ltd

Noida, India

- Provided player support by responding to gameplay inquiries, resolving technical issues, and ensuring fair play within the gaming community.
- Managed conflict resolution by addressing player disputes and enforcing community guidelines for hundreds of active users.
- Reduced repeated support queries by creating clear support documentation to assist players with onboarding and troubleshooting.
- Collaborated with the development team to design quest lines, storylines, and in-game dialogue for enhanced narrative-driven gameplay.
- Contributed to graphics asset integration, UI improvements, and visual consistency for a more immersive player experience.
- Provided actionable feedback to developers based on player interactions and testing, resulting in improved feature balancing and enhancements.

Education

Bachelor of Technology – Electronics and Communication Engineering (ECE)

GLA University

August 2015 – May 2019

Mathura, Uttar Pradesh, India

Certifications

Docker Mastery: with Kubernetes + Swarm | Udemy

- Comprehensive course covering Docker containerization, Kubernetes orchestration, and Docker Swarm for production deployments.

The Complete Web Development Bootcamp | Udemy

- End-to-end web development course covering frontend, backend, databases, and modern development workflows.

Modern JavaScript: From Beginner to Advanced | Udemy

- Comprehensive JavaScript course covering ES6+, async programming, closures, prototypes, and modern JS patterns.

Advanced React and Redux | Udemy

- Advanced course covering Redux architecture, middleware, state management patterns, and React performance optimization.
